Muhammad Salman - AI Developer

Company Context Document for MailVox

About Me

I am Muhammad Salman, a professional Python and AI developer based in Pakistan. I specialize in building AI-powered tools, automation systems, and backend APIs using FastAPI, Python, and OpenAI technologies. I have hands-on experience with PostgreSQL, Gmail API, and modern AI agent development.

Services I Offer

- AI Agent Development - Custom AI agents using OpenAI GPT models
- Email Automation - AI-powered email management and reply systems
- FastAPI Backend Development - REST APIs, authentication, database integration
- Database Design - PostgreSQL, SQLAlchemy, Neon.tech setup
- RAG Systems - Retrieval Augmented Generation with vector databases
- Gmail API Integration - OAuth2, email fetch, send automation
- Python Automation - Scripts, schedulers, background tasks

Pricing

My rates are flexible depending on the project scope and complexity. Here is a general breakdown of my pricing:

- Small Projects (simple scripts, basic APIs): $50 - $150
- Medium Projects (AI agents, email automation tools): $200 - $500
- Large Projects (full stack AI SaaS products): $500 - $1500
- Monthly Retainer (ongoing support and maintenance): $200 - $500 per month
- Hourly Rate: $15 - $25 per hour

Project Timeline

- Small tasks and fixes: 1 - 3 days
- Medium projects: 1 - 2 weeks
- Large projects: 2 - 4 weeks
- I provide regular updates and progress reports throughout the project

Technologies I Use

- Languages: Python (primary), JavaScript (basic)
- Backend: FastAPI, Uvicorn, SQLAlchemy
- AI/ML: OpenAI GPT-4o-mini, GPT-4o, Embeddings, RAG
- Databases: PostgreSQL, Neon.tech, pgvector
- APIs: Gmail API, Google OAuth2, OpenAI API
- Tools: Docker, Railway.app, GitHub, VS Code

Availability and Working Hours

I am available 5 to 6 hours per day, Monday through Saturday. I respond to all client emails within 24 hours. For urgent matters, I can prioritize and respond within a few hours. I am located in Pakistan (PKT timezone, UTC+5).

How I Work

- Step 1 - Discovery: We discuss your requirements and goals
- Step 2 - Proposal: I send a detailed proposal with timeline and cost
- Step 3 - Development: I build the solution with regular updates
- Step 4 - Testing: Thorough testing before delivery
- Step 5 - Delivery: Final handover with documentation
- Step 6 - Support: 2 weeks of free bug fixes after delivery

Contact Information

Email: available via LinkedIn and Upwork. LinkedIn: Active with 500+ connections. Upwork: Available for freelance projects. I welcome clients from US, UK, Australia, Canada, and worldwide.

Frequently Asked Questions

Q: Do you provide free consultations?

A: Yes, I offer a free 30-minute consultation to discuss your project requirements.

Q: Can you work with my existing codebase?

A: Yes, I can review and work with existing Python/FastAPI projects.

Q: Do you sign NDAs?

A: Yes, I am happy to sign NDAs to protect your business information.

Q: What payment methods do you accept?

A: I accept payments via Upwork, PayPal, and bank transfer.

Q: Do you offer refunds?

A: If I am unable to deliver the agreed scope, I offer partial or full refunds.
